EDUCATION

University of Bath

*Aerospace Engineering (MEng) With Professional Placement; Predicted **First Class***

Oct 2023 - Jun 2028

SKILLS SUMMARY

- **Programming Languages:** MATLAB, Python, Microsoft Excel
- **CAD Software:** Siemens NX, Autodesk Inventor, StarCCM+
- **Simulation Software:** StarCCM+, Simulink, Arduino Uno
- **Soft Skills:** Rapport Building, Excellent Communication, Collaborative Problem Solving

WORK EXPERIENCE

Engineering Intern | Rolls-Royce

June 2025 - Present

- **Cryogenic Fuels Design Engineer**
 - Designing novel pumping technologies for liquid hydrogen applications
 - Use of Siemens NX to design for manufacture and assembly of a high-precision test-rig.
- **Aerothermal Engineer**
 - Conducted a CFD verification and validation study on novel HP turbine cooling geometry
 - Used STARCCM+ CAD and CFD tooling to run test cases, refining parameters to match experimental boundary conditions
 - Used MATLAB to develop scripts to post process the data for validation against experiment
 - Resulted in company discussions, re-assessing current CFD methodologies for turbine blades

Engineering Operations Intern | Roboteam

Jan 2023 - May 2023

- Worked alongside Mechanical and Software engineers testing and maintaining unmanned robots
- Assembled camera systems for internal company use with successful unit and integration testing
- Worked with the QC team testing battery packs and configuring updated hardware chips

ENGINEERING PROJECTS

Automatic Ball Launcher

2024

- Designed and manufacture a motorised ball launcher from conception
- Produced technical drawings and complete CAD/CAM files to facilitate successful manufacture via CNC machining

Position Control System

2023

- Designed a PID-controlled closed-loop position system using Arduino and Simulink, achieving stable control of a cart on rails with <2 mm steady-state error.
- Implemented a first-order IIR low-pass filter reducing noise by >80%

Liquid Hydrogen Sustainability Research Paper

2021

- Managed a team investigating the viability of hydrogen fuel for the transport industry.
- Designed and 3D printed scaled model fuel tanks with a novel MOF application that was praised by industry leaders

EXTRACURRICULAR

- **Young Professional Ambassador** for the IET and STEM Learning UK.
- **Founder/Chair** of Spikeball Sports Club at the University of Bath arranging sessions for over 40 members and participated in national tournaments.
- **Events Organiser** for Rolls-Royce arranging socials, sports and activities for 500+ members
- **Editor and Coordinator** of School Newsletter - compiled and distributed articles written by a team of 20 students
